# Dr. Loh encourages getting Moderna to increase two-dose coverage in response to Pfizer shortage

BY ROB PAUL

Dr. Lawrence Loh, Peel’s Medical Officer of Health met with Town Council for an update on COVID-19 in Peel, and more specifically Caledon. As the total case number in Peel continues to improve with a cumulative case count of 111,141 — a 283 case increase since last week — there continues to be severe cases related to the Delta variant with 28 more deaths in the last week to bring the total to 806 in the Region.

For Caledon, there’s been 4,434 total cases with 12 in the last week and two more COVID related

deaths as the total increases to 20.

Vaccination goals continue to be reached though with 1,459,801 total doses administered in Peel — 150,639 between June 13 and June 21. In total, 65 per cent of the population in the Region of Peel have initiated their vaccination with at least one dose — 18.4 per cent of all residents have both doses.

“In the previous week, we have seen our incidence rate in the Region of Peel decline by another 40 per cent, week on week,” said Loh. “At this point in time in Peel, the test positivity is at three per cent with an incidence rate of 21 per 100,000

population — in Caledon those numbers are three per cent test positivity and 11.8 per 100,000 population. It’s important to note that these are the most favourable numbers we’ve seen in our community, almost since the reopening started back in August 2020.”

Loh says he is confident things are trending in the right direction in both the Region and the Province, but as Ontario continues its reopen, he says it’s just as important as ever to continue following the health and safety guidelines to make sure there’s no decline.

**Virtual hike nearly doubles support for Hospice**

BY ROB PAUL

Every year for the last 11 years, Bethell Hospice has hosted a hike that attracts people from all over Caledon and surrounding areas to participate in an effort to raise funds for essential programs and services.

In 2020, the hike had to adapt to circumstances of the pandemic, but still was able to raise over \$95,000.

That was the first virtual hike they had hosted, and it was a trial-and-error type of

situation. Between 2019 and 2020, the hike was able to raise a combined total of over \$265,000 for the Bethell Hospice Foundation

“All of the proceeds go to support the programs and services at Bethell Hospice so that anyone accessing either the residential care or any of our community programs can do so at no cost to themselves or their families,” said Julie Hymers, Bethell Hospice Associate Director, Marketing and Communications.

# Caledon resident sees dream come true as Hudson’s Bay begins distributing her cosmetics line

BY ROB PAUL

Everyone has a dream growing up, whether it be to become a professional athlete, an actor, an astronaut, or anything in between. But few actually get to see those dream come to fruition.

For Mercedes Gubert, she didn’t want to see her dream fall by the wayside, so she worked at it for years and let passion motivate her until she found success and now, she’s living her dream.

Nearly 10 years ago, Gubert made the decision that has set her up for success today: she started her own beauty business, Mercedes Lee Beauty. Her business offers luxury makeup, lash extensions, and hair services throughout Caledon and the GTA through in-home, on-site, or in-studio services for her clients.

Her goal was always to help people look and feel their best in their most important moments and from there she’s only taken it up notch by notch.

Gubert recently found out that the Hud-

son’s Bay would be picking up her cosmetic line—Artist Approved—and selling it in stores. The born and raised Caledon resident had always dreamed of going into the beauty industry and one day owning her own business, now she’s seeing it all payoff in ways she could have only imagined as a starry-eyed kid with a dream.

“I’ve always been passionate about the beauty industry, and it started from an early age, so my dream was always to start my own beauty brand,” she said. “But first I knew I had to get into the makeup industry somehow so I ended up going to Sheridan (College) for cosmetic techniques and management.”

She didn’t wake up one day and have success sitting there for her, she knew she would have to take the reins and so she worked at it and saw an opportunity to start something she thought was lacking in the industry she loved.

“Once I graduated, I actually opened up my own makeup and hair team for weddings and special events,” she said. “From doing all of the weddings and building up my clientele, I

Caledon entrepreneur Mercedes Gubert.

CONTRIBUTED PHOTO

felt there was almost a lack of clean beauty products in the industry, so I decided to start up my own brand and cater to customers that want a very quick and easy makeup routine.”

Gubert has been living her dream running her own business, but reaching a milestone like this one made all her hard work justified as she’s starting to get the recognition she deserves.

“It’s been great,” she said. “I started eight years ago now and I launched this beauty brand in December of 2018, so it’s been pretty exciting because it happened fairly quickly to get it into a huge department store like the Hudson’s Bay.”

When she found out that her cosmetic line would be going into a store as highly regarded as the Hudson’s Bay, Gubert was at a loss for words as she reflected on everything it took to get to this point in her life.

“It was definitely jaw-dropping, especially because I actually worked in the Hudson’s Bay Companies jewellery department when I was going to school in college,” she said. “To now actually have my own brand in the Hudson’s Bay is incredible, it’s been a crazy journey.”

She thinks what makes her makeup prod-

ucts desirable in a crowded market are that they’re essential products that are easy to use while remaining clean and cruelty-free. As for which of her cosmetic products the Hudson’s Bay will be selling, just about everything you can imagine.

“I have all different makeups—lipstick, lip glosses, lashes, makeup brushes—as well as skincare products right now,” she said.

Finding the motivation to work at this wasn’t difficult for Gubert because there was never anything else she’d rather be doing.

“It’s funny because from a young age I’ve always had some sort of an entrepreneurial drive,” she said. “I always knew I wanted to work for myself, I wanted to open up my own business, and I’ve always kind of had that in the back of my mind. So, I always knew that there was something better out there for me than your typical 9 to 5 job and having that passion really helped me to excel in my career.”

If you asked her 10 or 15 years ago if she saw herself having this type of success so soon, it would be hard for her to fathom.

“I thought that I was going to just maybe do this on the side and maybe get into something else—I thought I’d maybe go into interior design,” she said. “I always knew I wanted to do something creative, but I never thought that it was going to get to where it is today.”

It’s always nice to stop and smell the roses, but Gubert already has her sights set on the next goal. She doesn’t think she’ll ever feel finished and that’s part of the reason she’s made it as far as she has already.

“My future goal and the goal that I’m really trying to hit eventually—which I think is going to be a difficult one because the beauty industry is so competitive—I would love to get my products into Sephora Canada,” she said. “I don’t think I’ll ever be finished, there will always be a next thing that I want to do.”

To see Gubert’s makeup products from Artist Approved and the hair and makeup work she’s done through Mercedes Lee Beauty visit [mercedesleebeauty.com](https://mercedesleebeauty.com) or find it on Instagram @mercedesleebeauty.

# Full reopening could begin as early as September, says Dr. Loh

Continued from  
FRONT

“However, the situation is a little bit different from there, as you know the wild type coronavirus has since been replaced by the Delta variant—which was first identified in the Indian sub-continent—and this variant is more transmissible and more severe. It does suggest that with an increase in any contact or interactions rapid transmission and growth is forecasted by the Ontario Science Table and really requires us to continue with the measures that are in place with distancing and masking, and also to ensure we’re doing our very best to get to two-dose vaccine coverage in our community.”

Peel is beginning to reach thresholds towards a safe reopening with the adult population starting to near full first dose coverage thanks to the increase in clinic options.

“In respect to vaccinations, I’m pleased to report that we’ve hit our first milestone in our vaccination program with 76 per cent of the 18-plus population in the Region of Peel covered with at least one dose of vaccine,” Loh said. “As of [June 23] we will be approaching approximately 25 per cent of the 18-plus population with two doses of vaccine. Reassuringly—especially for a potential

return to school in the fall—approximately 60 per cent of our population between 12 and 17 have received one dose of the vaccine at this point in time.

“It’s important to highlight that getting to widespread two-dose coverage in our Region offers the best protection from COVID-19, in particular the Delta variant that threatens to grow in the event that we open too quickly,” said Loh. “At this point in time, we have developed a system capacity that is delivering approximately 25,000 doses per day across mass vaccination mobile, workplace, community, and hospital sites.”

Previously, Loh has stated that with 70 to 75 per cent two-dose coverage in Peel, they will be able to safely begin a full reopen and at the current vaccination rate that could be achieved by September.

“We are approximately vaccinating 10 per cent of our eligible population every week,” said Loh. “If you do the math—and we’re at 25 per cent right now—it’s just a matter of a month and some weeks before we actually get to broad two-dose coverage in our community, which I think will certainly cement any potential reopening with confidence.”

As the Pfizer vaccine continues to have supply issues, all clinics in Peel

have moved to offer Moderna for all appointments for adults—those between 12 and 17 will be vaccinated with the remains doses of Pfizer. To continue with vaccination progress, Loh wants to instil confidence in the community that mixing vaccines is safe and effective.

“At this time, we’re also dealing with continued supply chain challenges,” said Loh. “While overall vaccine supply has improved, we know that Pfizer is experiencing some delays both this week as well as in the first half of July. Moderna is going to be much more readily available, as they make up for their supply chain challenges that occurred in April and May. It’s very vital for me to state at this juncture that the National Advisory Committee of Immunization has deemed that both Pfizer and Moderna are essentially bio-equivalent in terms of their mechanism, they have a similar side effect profile and similar effectiveness profile—they are both safe and effective. There is encouragement that if we want to rapidly get to two-dose coverage, it’s less about what’s the label on the vaccine and more about making sure that you have two valid doses to ensure that we are able to continue to reopen with confidence and ensure that exiting

the acute phase of the pandemic is assured.”

The recommendation provides Peel with more flexibility to continue to vaccinate during the Pfizer shipment delay. The COVID-19 mRNA vaccines (Moderna and Pfizer) are interchangeable and mixing doses will allow for more two doses coverage in the Region.

“This Pfizer shipment delay provides us an opportunity

to remind our community of the clear science around interchangeability,” said Loh. “Our community Mass Vaccination Program has again built out to full capacity to quickly achieve broad two-dose coverage in Peel. Subject to provincial allocation, we will continue to use all available supplies of approved vaccine to keep our reopening on track. I urge all residents to access

two-dose protection in any approved combination as quickly as possible to protect themselves, their loved ones, and their community. I also remind our residents to be patient, kind, and respectful to all our vaccination clinic staff; they are working tirelessly to protect you with the tools and supply that they have been given.”

His last note was that the reopen might

seem slow and with the summer here residents might feel more confident returning to normal, but he wants to make clear the short-term sacrifice for long-term success is the best option.

“While the Province’s current reopening approach does seem slow and gradual, it’s taking into account a desire to ensure that this reopening is the last reopening,” Loh said. “By ensuring

we take this gradual reopening process, it ensures that we keep our contact and interaction numbers to a minimum—particularly indoors—it will allow us to increase our two-dose coverage across our community in the weeks to come.”

To book a vaccination appointment in the Region of Peel, visit [www.peelregion.ca/coronavirus/vaccine/book-appointment](http://www.peelregion.ca/coronavirus/vaccine/book-appointment).

**VEHICLE THEFT ENDS IN ARREST**

On Friday, June 18, 2021, at approximately 11:10 a.m., officers from the Caledon OPP responded to a reported stolen vehicle call for service in a parking lot of a business located on Highway 50 in Bolton.

“The complainant told the officers that they parked their Subaru Sport Utility Vehicle (SUV) and left it running with its keys in the ignition, while they went inside a convenience store to make a quick purchase,” say Police. “Upon the owner’s return mere minutes later, the SUV was gone.

“As a result of the joint police investigation between the Caledon OPP and Peel Regional Police Service, an arrest in relation to the stolen vehicle was made.”

Jaskirat Dhillon, 25, of No Fixed Address, has been charged with Theft Over \$5,000 and is expected to appear at the Ontario Court of Justice in Orangeville to answer to the charge. The charges have not been proven.

Here are several ways that drivers can protect their vehicles:

- Keep your vehicle locked at all times
- When parked, never leave your keys in the car. Close all the windows and the sunroof
- Never leave your car running and unattended
- Avoid leaving valuables inside your vehicle where passersby can see them
- Install an anti-theft system and/or GPS tracker in your car

**CATALYTIC CONVERTER THEFTS**

The Caledon Detachment of the Ontario Provincial Police (OPP) is appealing to the public for information in relation to recent thefts of catalytic converters in Bolton.

“On Thursday, June 17, 2021, officers responded to two separate incidents of theft of catalytic converters that occurred sometime overnight between Wednesday, June 16 and Thursday, June 17, 2021,” say Police. “In the first instance, a business located on Highway 50 was targeted, where numerous

catalytic converters were stolen from motorhomes. The second incident took place in a parking lot along Highway 50, where several buses were targeted.

“Theft of catalytic converters is a growing crime trend across the province, contributed to the rising prices of the valuable metals contained within converters. If you have any information that could assist with this investigation, please call the Caledon OPP Detachment at (905) 584-2241 or 1-888-310-1122.”

You can also provide information anonymously by contacting Peel Crime Stoppers at 1-800-222-TIPS (8477) or online at [www.peelcrimestoppers.ca](http://www.peelcrimestoppers.ca). When you contact Crime Stoppers you stay anonymous, you never have to testify, and you could receive a cash reward of up to \$2,000 upon an arrest.

Caledon OPP would like to remind vehicle owners to park their cars in the garage if possible, also:

- Corporate fleets should be parked in locked, well-lit areas. Vehicle alarms and security cameras can also act as a deterrent to thieves
- Vehicles can be parked in a way that makes it harder to access their underside, for example, against a wall or by other lower vehicles
- Make use of products designed to deter and prevent catalytic converter theft. For example, a wire cage can be installed around the converter, and welded and bolted to the underside of the car
- A mechanic can engrave a license plate number or vehicle identification number into the device as a deterrent. That can make it harder for thieves to sell to some scrap yards.

**TOW TRUCK OPERATORS CHARGED**

On May 31, a single motor vehicle collision occurred on Highway 9 near Heart Lake Road where a tractor trailer partially drove into a ditch, blocking most of the highway.

“An off-duty member from the Caledon OPP Community Response Unit came across the scene minutes after the collision occurred and provided assistance, ensuring there were no injuries or hazardous materials involved,” say Police. “The officer arranged road closures and began the process of clearing the highway with tow trucks that arrived on scene.

“While this process was under way, three tow trucks proceeded past the waiting traffic and parked in close proximity to the collision scene. Police investigation revealed that none of the three tow trucks held a valid Town of Caledon tow truck licence, and only one of the drivers held a Town of Caledon tow truck operators licence.”

As a result of this incident, a total of 15 charges have been laid under both the Highway Traffic Act and the Town of Caledon By-Law.

“Tow trucks are bound by a variety of rules, both provincial and municipal. They must hold a CVOR, be properly licenced and equipped, be operated by a licenced driver, hold a local tow licence, and cannot attend the scene of a collision unless summoned by police. Caledon OPP continues to conduct compliance checks and enforcement on all tow trucks operating in the Town of Caledon.”

**DANGEROUS DRIVING CHARGES**

On Thursday, June 17, at approximately 8:30 p.m., uniformed officers from the Ontario Provincial Police (OPP) Caledon Detachment responded to a call for service on Grapevine Road in Bolton.

“Police received information from several witnesses about a driver operating a vehicle in a dangerous manner on a residential street, nearly hitting several pedestrians,” say Police. “The onlookers became upset and confronted the driver.”

The officers attended the area and conducted an investigation. As a result, Noah Abramovitch, 20, of Caledon, has been charged with Dangerous Operation of a Mo-

tor Vehicle.

The accused is expected to appear at the Ontario Court of Justice in Orangeville on August 26, 2021 to answer to the charge. The charges have not been proven.

“Caledon OPP is reminding drivers to obey the maximum posted speed limit, particularly in residential neighbourhoods. Driver behavior is crucial to safety in residential neighborhoods. When you are driving, go slow enough to see and respond to every new circumstance, which includes children and other vulnerable road users.”

**RV COLLISION**

On Monday, June 21, at approximately 3 p.m., uniformed members from the Caledon OPP responded to a collision that involved a wheel striking two vehicles on Airport Road south of Highway 9 in the Town of Caledon.

“Information was received that a wheel came off of a recreational vehicle (RV) and struck two cars,” say Police. “The officers patrolled the area and located the RV on Highway 9. The driver was not aware of them losing the wheel along the way.

No injuries were reported at the time of the collision.”

As a result of the investigation, the driver of the RV, a 32-year-old female from King City, was charged with:

- Operating an unsafe vehicle
- Fail to have insurance card
- Fail to surrender permit for trailer

The driver is expected to appear at the Caledon East Provincial Offences Court on a later date to answer to the charges. The charges have not been proven.

“Caledon OPP reminds motorists before every RV trip, be sure to tighten your RV’s wheel lug nuts and measure tire pressure to ensure your safety on the road. Check the vehicle’s wheel lug nuts to make sure they have not loosened up at any point during previous travel or while in storage. Driving with loose lug nuts is dangerous and could lead to losing a wheel on the road, causing property damage, injuries or even death.”

# Victory House receiving sizeable donation from Rock Garden Farms

BY SAM ODROWSKI

A local organization working to create support services for women and children in crisis is receiving a much-needed financial boost from a business in the area.

Rock Garden Farms (16930 Airport Rd, Caledon East) is donating \$3,000 to Victory House, which is a newly established transitional home that will offer support, training, and refuge to women and children in need, once it officially opens its doors later this year.

The donation was made possible through Rock Garden’s recent fundraiser, where all the proceeds from rosebush sales went to Victory House.

“We are trying to support women in the hard times that they are going through right now, along with their families,” said Margaret Galati, head of operations at Rock Garden Farms.

There are over 50 volunteers who are working to build Victory House and they run the Victory Lap Emporium (18420 Hurontario St, Caledon Village), which is a store that sells donated items and has been struggling to generate revenue due to the provincial lockdowns for COVID-19.

“We really wanted to support them because COVID also kind of put a damper on them selling to the public – it can be hard to sell stuff online,” explained Galati.

“We do try to help out a lot of the local charities overall.”

In addition to Victory House, Galati noted that Rock Garden regularly supports Headwaters Health Care Centre, Bethell House Hospice, Family Transition Place and the local food bank.

Galati told the Citizen the whole team at Rock Garden Farms is very grateful to the community for their support, as they

wouldn’t be able to make the donations that they do otherwise.

“As people continue to support me, I can continue to support the community,” said Galati. “I’m just honored to be able to support all the greatly needed things – there’s always a need.”

Rock Garden Farms is a family-run business that’s been at the same location on Airport Road for 33 years, while the family’s been selling in Caledon for around 40, with Galati’s grandparents and children involved.

“It’s ‘Three Generations One Passion’ – that’s our motto,” she said.

“It’s great to be a part of the community. To be here running a business, as a family. We all love what we do.”

Being a community-minded business, Rock Garden Farms stocks its shelves with produce from local farmers and Ontario based producers, in addition to what they grow on their 88-acre farm themselves.

The store is also well known for its sauces, jams, and lasagna that’s made in-house.

“If people are looking for homemade products, we’ve got them covered,” Galati noted.

Anyone looking to do some strawberry picking should also stop by Rock Garden Farms.

The activity started up on June 16 and will run for three weeks. The strawberry patch is open daily from 8 a.m. to 4 p.m.

Galati encourages anyone who’s looking to get out of the house and enjoy a safe activity while COVID-19 restrictions continue, to stop by Rock Garden Farms for some strawberry picking.

To learn more about the business and everything it has to offer, visit: [www.rock-gardenfarms.ca](http://www.rock-gardenfarms.ca).

## PUBLIC NOTICE

### NOTICE OF SECOND PUBLIC MEETING

0 and 10261 Highway 9

Proposed Draft Plan of Subdivision and Zoning By-law Amendment

FILE NUMBER(S): 21T-08001C and RZ-08-05

Please note that a second Public Meeting is being held due to technical issues accessing the Public Meeting of May 11, 2021. A Public Meeting will be held to consider proposed Draft Plan of Subdivision and Zoning By-law Amendment. Your input and insight will inform and shape plans that meet the needs of our community.

Due to continuing efforts to contain the spread of COVID-19 and to protect individuals, Town Hall will not be open to the public to attend Public Meetings until further notice. These meetings will be held electronically.

DATE AND TIME: July 20, 2021 | 7 p.m.

To listen to the Meeting (but not participate), you may call 1-833-311-4101, Meeting Access Code: 132 802 1215#.

Members of the public are welcome to participate via phone or WebEx Meeting upon request. For more information on how to participate, please visit [caledon.ca/notice](http://caledon.ca/notice) or contact the Planning Department. Please note that there are deadlines by which the request to participate need to be made.

You can also ask questions or provide comments by:

- Submitting written correspondence to [agenda@caledon.ca](mailto:agenda@caledon.ca) and [planning@caledon.ca](mailto:planning@caledon.ca) for consideration during the Public Meeting. Please note that written comments will form part of the public record.
- Contacting Planning staff or the Lead Planner during office hours by phone or email.
- Booking an appointment to visit Town Hall to speak with Planning staff. Visit [caledon.ca/development](http://caledon.ca/development) for more information.

#### APPLICANT:

Rob Russell Planning Consultants Inc. on behalf of 1685078 Ontario Inc.

#### LOCATION (WARD 4):

0 and 10261 Highway 9  
Part Lots 28 and 29, Concession 9 (Albion)  
South-East Corner of Highway 9 and Mount Pleasant Road

#### PROPOSED CHANGES:

To establish a plan of subdivision on the subject land consisting of 22 estate residential lots, reforestation areas, an extension of Walter Brown Drive (Street A) from the Beaverhall subdivision to Mount Pleasant Road, a block for stormwater infrastructure, and blocks associated with widening/reserves along Highway 9 and Mount Pleasant Road. The Zoning By-law Amendment proposes to rezone the lands from Rural – Oak Ridges Moraine (A2-ORM) and Environmental Policy Area 2 Zone – Oak Ridges Moraine (EPA2-ORM) to Estate Residential – Exception XXX – Oak Ridges Moraine (RE-XXX-ORM) and Environmental Policy Area 1 – Oak Ridges Moraine – Exception XXX (EPA1-ORM-XXX) to permit site specific uses and standards to implement the proposed plan of subdivision.

#### LEAD PLANNER:

Valerie Schmidt, MCIP, RPP, GSP Group  
On behalf of  
Development Review Services, Planning Department,  
Town of Caledon  
519.569.8883

# Council moves to extend face-covering bylaw until Sept. 30, specifies definition of what’s a proper mask

BY ROB PAUL

Although vaccination milestones are continuing to be achieved, due to the Region of Peel’s high rate of community transmission and the continued high-impact of the variant, Caledon Council passed a motion to extend the Town face-covering by-law until September 30, 2021.

“The definition of masks was based on data and science that we were seeing and was not intended to be punitive; it was intended to equip our residents with the knowledge around how best they can protect themselves and each other,” said Dr. Lawrence Loh, Peel’s Medical Officer of Health. “At this late juncture in the pandemic, none of us want to see us go backwards, especially with the more transmissible Delta variant. All of us just want to make sure that as we reopen, we are still maintaining the appropriate levels of protection which will give us reassurance as we get to two dose vaccine coverage that our reopening will be able to continue with confidence.”

With the passing of the bylaw, the definition of face-covering was also updated to ensure that proper masks are being worn in the community.

The new definition reads, “‘Face Mask’ means a mask or face covering, without an exhalation valve(s), that can be well secured to the head or ears, cannot easily move or slip out of place, and is large enough to completely and comfortably cover the mouth, nose and chin without gaping. For greater clarity, a Face Mask may include, but is not required to be, a medical mask such as surgical masks, N95 or other masks required by healthcare workers. A Face Mask does not include a face shield, scarf, bandana, neck gaiter or neck warmer.”

As people become more burnt out over COVID-19 restrictions, Councillor Johanna Downey rose concerns that she had heard from members of the Caledon community regarding the specificity of the face-coverings residents are being asked to use.

“It came to our attention in our review that many of the outbreaks that had occurred—particularly in certain workplaces and areas in the community—were as a result on inadequate masking, specifically masks that did not hold

back droplets and served not to function” said Loh. “When we were seeing this in the course of our data and our outbreak investigations, the recommendation from our team was to actually update the masking bylaws. We were considering bringing this in the midst of the third wave, but unfortunately for obvious reasons we had many other pressing needs at the height of the third wave. This is about education and messaging to our residents about how they can keep themselves and their loved ones safe while we get through this final phase of the pandemic to really ensure our reopening continues without a hitch.”

Councillor Jennifer Innis asked Loh why this change to which masks are acceptable is coming now this deep into the pandemic because she’s worried there will be a lack of understanding of why specific masks are being encouraged now and wants there to be mask education available to residents.

“The Public Health Agency of Canada came out during the second wave strongly in favour of what was previously called a three-layer mask because they’re well fitted and meant to contain droplets,” said Loh. “That recommendation only grew stronger as we entered the third wave and subsequently saw our data. It has been some time since the recommendations from the federal level have changed and it hasn’t been augmented with our own experience and data, so I can certainly take this back to my team and see what is planned in respect to education. I will confirm they have plans to broadly disseminate the rationale for the updated masks at this time.”

The new bylaw is set until the end of September, but Loh reminds residents that it could come to an end sooner for fully vaccinated residents, if the Town and Region reach two-dose vaccination thresholds.

“I’m hopeful that as we get to more fully vaccinated coverage within our community and the Region of Peel, the Province will be able to issue guidance, particularly around what people who are fully vaccinated can and can’t do—especially around precautions such as masking,” said Loh. “While the proposal is to extend to September, things may change in the months to come. The sooner we get to broader two-dose vaccine coverage, the sooner many of these precautions hopefully resolve all together.”

Millions of people across Ontario have received their COVID-19 vaccine.

# Virtual hike for Bethell Hospice nearly doubles last year’s fundraiser total

Niki’s Butterflies was just one of the many teams participating in this year’s Virtual Hike.

**CONTRIBUTED PHOTO**

Continued from FRONT

This year, with time to prepare, the virtual hike was able to kick off on Sunday, May 2, to coincide with the beginning of National Hospice and Palliative Care Week and participants were able to go on their virtual hike anytime and anywhere until May 31.

With the shift to virtual this year, the hike was even able to include animals to help bring attention to the cause while allowing for some extra cute social media posts.

There were teams led by dogs like Hymers Miniature Australian Shepherd, Ariel, and others led by a plethora of farm animals, like the Barnyard Team from Riverdale Farm—led by Heidi the miniature donkey and supported by Thomas the Nubian goat, Emma and Krissy the Haflinger horses, and Muppet the Plymouth Rock Hen.

With less opportunity for fundraisers over the last 15 or so months due to COVID-19 restrictions, Bethell Hospice needed the virtual hike to attract even more support than normal to help ensure their programs can remain free to those in need; they need to raise over \$1 million per year to continue to provide free services to the community

Luckily, Hymers and staff were positively overwhelmed by the amount of support that was given from Caledon residents and beyond and pleasantly surprised with how willing people were to buy into the virtual aspect.

“We were just thrilled with the outpouring of support for this year’s virtual hike,” she said. “Registered hikers were able to pick up their hike kits via curbside pickup at Bethell

Hospice and leave us messages and photos for our memory board. We held our opening ceremonies online on May 2, followed by a week dedicated to the hike, and closing ceremonies on May 8. Throughout the week, people completed their hikes throughout the community—and some even chose to hike every day during the week.”

Overall, the hike attracted huge numbers, which in turn led to the virtual hike nearly doubling last year’s total raised and allowed them to blow by their goal of raising \$125,000.

“30 teams participated in this year’s virtual hike, as well as a number of individuals who were not part of a team. In total, there were 163 participants hiking for Bethell Hospice, including a number of first-time hikers, and many first-time donors. Our community really came out and supported the hike in full force, and we could not be more grateful. We had our most successful year ever, raising over \$180,000 in support of Bethell Hospice programs and services.”

Not only did people take to social media to show off their fun on the virtual hike, but the vast majority of participants reached out to Bethell Hospice to show their commitment to a needed staple in the community.

The hike being virtual also lent itself to people getting creative and even some from across the country hopping in to show they care.

“We encouraged people to share photos of their virtual hikes with us and were really excited to see all the creative ways people found to get involved,” she said. “While

most people completed a traditional hike or walk, some participants chose to cycle, or even scale a rock-climbing wall, in support of Bethell Hospice. We even had some teams taking advantage of the virtual format by having family members participate from as far away as Vancouver.”

Having free services to those in need like the Bethell Hospice, is something the Caledon community has come to know, but it’s clear it’s not taken for granted.

The flurry of support through the virtual hike was huge for helping Bethell Hospice keep everything going as smoothly as they can in a year as tough as this last one.

The programming being offered has even gone up a notch with a need for extra support for many in the community and Hymers is thankful they’ve been able to be there and will continue to be there for the people of Caledon.

“Throughout the challenges of COVID-19, Bethell Hospice has continued to provide outstanding palliative care to residents and their families,” she said. “The demand for our community programs has also increased exponentially, as people isolated during the

pandemic reached out for counselling, grief and bereavement support in record numbers. Fundraising during a pandemic is a real challenge, when in person events cannot go ahead, but the need for hospice services are greater than ever. The support of this year’s virtual hike shows how much our community values Bethell Hospice, and how it stepped up to make sure our care could continue. We could not be more grateful.”

Though the virtual hike is in the rearview mirror, fundraising continues at Bethell Hospice through events such as the monthly 50/50 online raffle and through personal donation.

“People can go online to our website and buy tickets with 50 per cent of the proceeds supporting Bethell Hospice programs and services directly and the other 50 per cent is the price for the individual,” said Hymers.

Those who wish to donate to Bethell Hospice can do so at [bhf.akaraisin.com/ui/bhfdonations/donations/start](http://bhf.akaraisin.com/ui/bhfdonations/donations/start) and for more information on the monthly 50/50 raffle and upcoming fundraisers visit [foundation.bethellhospice.org/category/upcoming-events](http://foundation.bethellhospice.org/category/upcoming-events).

## Town will not be hosting any Canada Day festivities due to COVID

**BY ROB PAUL**

Although Canada Day is just around the corner, the Town of Caledon will not be hosting any festivities due to COVID-19 restrictions.

The Town doesn’t want to invite a gathering and felt the best way to ensure health and safety protocols will be upheld is by people celebrating on their own within gathering limits.

“To comply with physical distancing and gathering restrictions, there will be no public fireworks displays for Canada Day,” said a Town spokesperson. “Due to COVID-19, there are no Town-led Canada Day celebrations happening in 2021.”

The Town also wants to remind residents of the rules against discharging of fireworks. Caledon strictly prohibits setting off fireworks on public property, parkland, parks, roads or sidewalks and all designated outdoor spaces.

In Caledon, fireworks can only be set off on

private property on Canada Day (July 1) and Victoria Day. Discharging fireworks on any other day is in violation of the by-law and is subject to a fine.

As for the sale of fireworks in Caledon, retailers can only sell fireworks during the 10 days prior to Canada Day, starting June 22. Cost of the permit is \$183.00, non-refundable—all retailers must purchase a permit.

To apply for a fireworks sales permit in Caledon, vendors must download and complete the vendor permit ([www.caledon.ca/en/town-services/fireworks.aspx](http://www.caledon.ca/en/town-services/fireworks.aspx)) and email the permit and all necessary documentation to [fire@caledon.ca](mailto:fire@caledon.ca).

Fire Prevention staff will be conducting fire safety inspections to verify compliance with the fireworks By-law and any other federal and provincial regulations.

To learn more about fireworks safety guidelines, visit [caledon.ca/fireworks](http://caledon.ca/fireworks). For questions and concerns about fireworks, contact (905) 584-2272 Ext. 4303 or email [fire@caledon.ca](mailto:fire@caledon.ca) and to review the fireworks By-law, visit [caledon.ca/by-laws](http://caledon.ca/by-laws).

Brock’s Banter

The Hunt for Second-Dose Summer

BY BROCK WEIR

Given the shortage of COVID-19 vaccines that became the hallmark of the first quarter of the year, setting the goal at a “two-dose summer” may have been seen as a lofty dream at the time.

We were lagging behind the world in rolling out our first shots, as infographics circulating through social media and beyond wanted to underscore – despite the fact that many such infographics pegged our vaccine rates against the comparatively sparsely populated non-nations of Jersey, Guernsey, and St. Helena, among others.

Not quite comparing apples to apples but, unfortunately, there was some truth to the point they were trying to make, despite a couple of missed targets.

Now, here we are, on track to regaining some sense of normalcy with second shots for many of us now coming in relatively quick succession after our first doses.

If the pandemic has taught us anything, it’s that patience is more than just a virtue. The pace for most things under its yoke has done anything but quicken. Most of us have, after all, been spending the majority of time at home trying to find our excitement where we can in our individual attempts to flatten the curve. When there’s a good excuse to go out and do something – anything – time seems to kick into hyperdrive, making the thrill pass all too quickly, all for it to come to a screeching halt with the task completed and we’re homeward bound again.

For better or worse, our new normal right now seems to be one of “hurry up and wait.”

Take, for instance, the rollout for the second dose.

Tasked as I was the first go-around, a couple of weeks ago I started my Monday in front of a computer screen. Sure, in this line of work I’m almost always in front of said screen, but this time was a bit different: I had to secure a second dose appointment for my mom.

To say securing the first one was a challenge might be something of an understatement. There were limited doses to go around, so I knew at the time I had to log on at the stroke of 8 a.m. to secure one. Then 9 a.m. rolled around. 10. 11. 11.30. By noon, it seemed like a lost cause. All area clinics were fully booked some time before I was let out of the virtual waiting room – a visual I’m sure we can all agree we would prefer never to have to see again – and I was out of luck.

Or was I?

Things were changing rapidly as people who secured appointments near the end of the date allotments shopped around and snapped up appointments secured that morning and given up almost just as fast as earlier appointments miraculously appeared in the system.

Refresh.

Refresh.

Refresh.

That was my life for the next 24 hours and then, a single appointment appeared right before my eyes – on Easter Monday, no less – and I pounced on that quicker than I ever thought possible.

As second doses rolled around, I was braced for the worst.

Coffee was brewed, bread was toasted and buttered, I became at peace with whatever virtual hellscape awaited me, and logged in.

After just an hour or so later, I was released from the virtual waiting room and within a few seconds was able to snag one just two days later.

Things were looking up and it got the week off on the right foot.

Then came word by the end of the week that the time to register myself, based on the date of my first shot, would be this past Monday, June 14.

Another Monday, another alarm set far earlier than I would have liked, coffee and toast waiting for a bit later given the easy and breezy experience securing my mother’s second dose... and then 9 a.m. rolled around. 10. 11. 11.30. By noon, I was released from the queue into a sea of nothingness, refreshing and refreshing throughout the rest of the day to the point that I was at least three hours behind in my work. All for naught.

Disappointed and tired, I crawled into bed that night telling myself that although I struck out earlier that day, things might change as new appointments were due to be released throughout the week.

The following day, the alarm was once again set earlier than I would like, needing to catch up on everything I didn’t have time for on Monday. Coffee in hand to make up for the previous morning’s draining experience, I logged on, clicked refresh one more time, and lo and behold a lone appointment popped up, scheduled for just 90 minutes later.

Needless to say, I flew to make it. And so I did.

Although this last shot was slightly less satisfying from a physical standpoint than the first as my nurse was stealthy with her syringe and it was in and out before I had time to feel anything, let alone the singular exhilaration of the first shot’s twinge knowing the coveted formula was working its way into my system. Getting that shot of hope was nonetheless an emotional experience – even if I didn’t feel the sweet sting of safety.

It took a little while for the fact it was now done to completely sink in. Once it did, I began making a mental list of all the things I would soon be able to do once the Pfizerization was complete. A mental list only, mind you, as we still don’t know what the future is going to bring.

Over the last few weeks, we have seen examples from all around the world on what our own two-dose summer might look like, with New York City and Los Angeles opening back up, parts of Europe already back into the swing of things, and even our leader socializing maskless – but distanced – at last week’s G7 meeting.

We have an idea of what’s coming, but, as has been the case with all steps of this pandemic, absolutely nothing is set in stone.

Getting there will only be due to our collective efforts to get done what we know we all need to do and continue to be mindful of our friends and neighbours.

We just have to be patient, both with the vaccination process and what the end of the vaccination process will mean for our future.

It might seem like we’re hurrying up to wait once again, but once the time comes, it will be all worthwhile.

Today is our new starting point in life by Mark Pavilons

Emerging from our caves should be a bit of a reawakening for all of us.

We’re seeing the bright light of day for the first time in months. Soaking up the sunshine is amazing, and you can see the joy on the faces of those enjoying outdoor patios.

Humans are social creatures. Sure, we come complete with a plethora of shortcomings, but we also have some rather nifty qualities, too.

God gave us strong shoulders to bear many burdens. My dad always commented what he saw as my strong, broad shoulders.

Over the years, however, they’ve drooped a bit. The weight, it seems, never wanes, but the muscles tire and tendons stretch.

I came across a great quote, from an America’s Got Talent contestant: “You can’t wait until life isn’t hard anymore to decide to be happy.”

This came from a 30-year-old singer who’s battling cancer. She nailed it. Life will always be hard, or at least challenging in many ways.

God also gave us the amazing ability to cope, keep going, combined with strong neck muscles to hold our heads high.

Pretty cool if you think about it.

It made me think about a lot of things.

In my life and my career, I’ve always tried to give everyone the benefit of the doubt. I’ve encountered literally thousands of individuals over my career, and I take away something from each and every one of them.

I have met many “characters” and, fortunately, this trend continues. People themselves are the spice of life and in my opinion, the more unique, the better. I still smile when I think of some of the odd characters I’ve met and written about.

There was the cane-stomping minister who was an outspoken opponent to same-sex relationships back in the day. There were local business owners, armchair critics, watchdogs, outspoken politicians. There were people who achieved greatness, and those who suffered way too much. There were high-achievers, and wrongly incarcerated. There have been brilliant scientists and those suffering life-altering illnesses.

God bless them, each and every one of them. In society, it’s quite easy to be judgmental and cast stones, even if your house is made of tinted glass.

I try to look at all the sides. People almost always seek “the truth” or argue that what’s presented “isn’t the whole truth.” From experience, I know that the real truth is often a matter of per-

ception. Sure, you can verify facts and events, but you can’t always perfectly recall them because people all have different senses, perceptions, blinders and biases.

The truth, or a reasonable variation thereof, almost always lies in the middle. Nothing is black and white and more often, it’s a few shades of gray. Most of the time, those gray textures mix together into a truly unique colour palette all on its own.

Sure, it makes my job (and likely many others, too) difficult and sometimes near impossible. Some say that’s the beauty of it all – things are so interesting and weird where people are involved.

Another thing I’ve learned over the years is that almost everyone has their own personal agenda. It may be subtle, clear and robust, but often it’s hidden, neatly disguised.

Do members of the public, government and various agencies take advantage of the media? Of course.

It’s in their own self-interest. But in a way, that’s part of our mandate, to help promote and publicize.

I often hear the term “level the playing field,” but I don’t even know if that’s possible. We are all so different, from different walks of life, different backgrounds and different socio-economic levels that it’s virtually impossible for everyone to be equal.

We have fundamental laws and rights enshrined in our Charter of Rights and Freedoms. I revisit this document from time to time, to get a feeling for what this country should be like. It comforts me that we have such a document and set of rules. I am reassured that in the end, our tolerance, compassion and acceptance of others will prevail.

And that’s where I’m going. As society gets “back to normal,” maybe it’s time to tweak our perceptions, maybe even get our eyes checked. We need to see differently.

And we need to make amends.

I have been blessed most of my life. Most of my challenges I brought about all on my own. Sure, I made mistakes. Who hasn’t? Do I have regrets? Sure, I do. I feel bad sometimes about decisions or actions that may have hurt others, mostly unintentionally. I am sorry if I caused anyone undue pain or hardship. Do they plague me? Sometimes. But again, that’s what my shoulders are for.

We can’t put the brakes on and travel in reverse. We are here. This is our new starting point. This is the place from where we move on and move forward.

I firmly believe in treating people fairly, being pleasant and cordial, forgiving and being open to new things.

As we walk down the street, and see our fellow citizens, we should be grateful that we’re part of our rich society. We should be cautious in our judgement because we don’t know if that person who holds the door open for us has cancer or lost a loved one to COVID. We don’t know if they’re recovering from tragedy, or if they’ve just won the lottery!

For this reason alone, we need to treat people better. We need to BE better.

Let’s make that our new battle cry as we grow, evolve and succeed together after a very trying year.

Our Readers Write

Yes or no on Highway 413?

In 1987, I moved from Brampton to Caledon where the roads were quiet, safe and not too travelled.

Then, as the surrounding areas kept developing, I noticed more and more traffic.

I now take my life in my hands crossing the road to get my mail.

On the strip of Dixie Road where I live, between Mayfield and King Roads, the Region of Peel has recorded 100 accidents in the past five years. One hundred! And we also now see transport is no longer a Monday to Friday business but rather a 24/7 business.

And we keep reading about the planned growth for Caledon and surrounding communities.

I have been to all the public meetings re-

garding the 413 and everyone of them shows how the planners and conservation authorities have designed the latest route to have as little impact on the streams and environmental sensitive areas as possible. So, as I read all these stories of people apposed to building the 413, I have not seen one suggestion as to where all the new traffic will go.

And that makes me think that so many of the now quiet and less travelled roads throughout Caledon will become just like mine: busy and dangerous and not the Caledon we know and love.

## Caledon gets new junior team into NDBL

BY ROBERT BELARDI

There’s a new baseball team in Caledon. The Caledon Nationals (previously known as the Bolton Braves) have had a junior team accepted into the North Dufferin Baseball League this year. VP of Rep for Caledon Baseball and this year’s head coach Bill O’Neil says the reason to join was to provide an opportunity for over-aged players who missed out last year. “Originally it was U-21. The problem is, since COVID they bumped it up to U-22 now,” O’Neil explained. “A lot of 22-year-olds never had a last year. Once you hit over 21, you’re supposed to move on to senior which would be to the Dodgers or the Brewers.” O’Neil recognized the need in the Town and once last year’s season shut down due to CO-

VID-19 he began organizing a group of players that would be interested in playing junior. He liked the NDBL and he knows Bolton Brewers head coach Mike Wallace personally. Caledon, which currently has two senior teams registered in the NDBL, will now be providing a much-needed outlet for players who will exit the midget level. For players currently in midget, O’Neil said he may call them up for a chance to make a few appearances in junior. Since moving to Bolton over 25 years ago, O’Neil immediately got involved in the local baseball community. He won two Ontario Baseball Association championships with the Bolton Braves. Now with a formal name-change to the organization, O’Neil hopes the fresh new feel to the sporting entity will bring in a championship but ultimately for this year in particular it’s all about having fun.

“I want these guys to go out there and have some fun. Obviously, we want to win. I’d like to see them all play, we’re all here to play,” O’Neil said. “We got a good group of guys here. We all get along.” But, of course, there is a wait time that interferes in doing so. On June 27, O’Neil is scheduled to meet with the NDBL over Zoom to discuss the steps to take moving forward with the other five teams in the league. After that, it all depends on the government with when games will be permitted. The hope is that day comes sooner rather than later. Even while waiting the work won’t stop now. O’Neil is scheduling a practice with his new team this Sunday. Due to health restrictions, he will have to spread his team out. The maximum players in the infield and the outfield separately is 10.

## To be “Stronger” sometimes you have to change

BY ROBERT BELARDI

If someone asked you what would September 2021 hold, many citizens might have a puzzled reaction and a very unsure response. But in an ideal world, and especially for families with an interest in hockey, Executive Director of the Ontario Minor Hockey Association Ian Taylor most definitely has an idea. “We’re trying to see some light at the end of the tunnel for September. Kids will be back at school. Kids will be back on the ice. I hope all the summer sports get to have some sort of season because they’ve been hit twice,” Taylor said. In a period where many have counted their losses and tried to look forward, OMHA introduced a movement they call “Stronger.” Before the pandemic, Taylor said registrations had seen a lot of children sign up and a lot of them drop out. He recognizes there are a lot of options children have now in society and hockey might not be the first choice for everyone. “Then we go through the year we’ve had and the kids that did sign up didn’t get to play a whole lot. There were restrictions on numbers. There were shutdowns and lockdowns. The second part of this is basically saying we’re here and we’ll be here. We want you to come back.” The OMHA have tried to find ways to make it easier for children to get on the ice. They’ve provided equipment to certain organizations but, above all, the OMHA understands the mental disparity that speaks loudly to the adverse effects the pandemic has had. Continued on Page A17

### “How are you celebrating Seniors Month?”

by Chrissy Jarvie, Communications Lead

The month of June marks a variety of celebrations: Indigenous History Month, Father’s Day and Summer Solstice, among others.

In Ontario, it’s also Seniors Month!

Seniors are the fastest-growing demographic in Ontario with the majority wanting to age at home in their community. This year’s Seniors Month theme is, “Stay safe, active and connected”.

At Caledon Community Services (CCS) our seniors’ programs practice this theme in June and every day of the year, especially during the pandemic.

“We are trying to find the positive every day despite the pandemic. This happens through our team’s ability to create new touchpoints for people who are isolated and vulnerable,” says Kim Shadlock, Senior Manager, Health Services. “These connections have a powerful impact on those who need it most.”

CCS Personal Support Workers (PSWs) provide Assisted Living and Respite Companionship to hundreds of seniors in Caledon, helping them in their homes and helping them stay in the community they love. Transportation to medical appointments, grocery shopping and other essential destinations continues through CCS, allowing seniors to attend to their needs safely and independently. Our Seniors Health and Wellness Program has transitioned from in-person gatherings to virtual activities like telephone wellness check-ins, telephone bingo and daily home deliveries of activity packages and fresh/frozen meals.

These services and so many more such as Food Support and Care Coordination help our senior neighbours remain independent, avoid isolation and as the theme for this month states, “Stay safe, active and connected”.

“The pandemic has had a devastating effect on many seniors”, explains Silvana Ferrari, Seniors Health and Wellness Coordinator. “The feelings of loneliness and isolation are very real.”

As June comes to a close, connect with seniors in your circle; a simple phone call goes a long way! If you’re a senior looking for a helping hand or you’re looking for support for a senior, CCS is here to help. Visit ccs4u.org or call 905-584-2300 to connect with our team.

**How Do You See It?**

# Caledon SC planning to run games next month

BY ROBERT BELARDI

If the European Championships have provided all kinds of excitement to soccer fans then the local club in the community will most definitely provide excitement right on the pitch.

About 250 competitive players within Caledon Soccer Club returned to the pitch last week and the Tiny Tykes program began again last weekend. With the Ontario government introducing their return to play mandate on June 14, all there is just the waiting game before matches can resume.

"The regional league is tentatively set to start July 12," said coach and technical director Terry Madison.

"They're just waiting on some stuff from the government. If not, then July 23. They want to run a league (for competitive) all the way until the end of September so that we can get 12 games in."

Once competitive leagues are permitted to return, Madison added that the house league program will follow suit. House league games would be planned to run from July 19 until the first week of September. Uniforms are on the way in and teams are slowly being assembled.

The Ontario Cup is being planned and a return date has not been set in stone just yet.

"It's a busy time and we got less time to pre-

pare. But everyone is working at it and it's super that way."

Parents who bring their children to practice must drop off their child and leave. COVID-19 screening questions are constantly being done and monitors are at the fields. If ever a case arose or anything were to happen, the club is prepared with all of their sheets and documents for tracing.

Once the summer is complete, and hopefully a successful summer with no complications happens, Madison is hopeful the indoor league will be available to run through the winter.

For any queries or concerns, please contact Caledon SC directly for any further information.

## PUBLIC NOTICE

### NOTICE OF PUBLIC MEETING

12599, 12563 and 12585 Highway 50, and 2 Industrial Road

Proposed Official Plan Amendment and Zoning By-law Amendment

FILE NUMBER(S): POPA 2021-0003 and RZ 2021-0008

A Public Meeting will be held to consider proposed Official Plan Amendment and Zoning By-law Amendment applications. Your input and insight will inform and shape plans that meet the needs of our community.

Due to continuing efforts to contain the spread of COVID-19 and to protect individuals, Town Hall will not be open to the public to attend Public Meetings until further notice.

DATE AND TIME: July 20, 2021 | 7 p.m.

To listen to the Meeting (but not participate), you may call 1-833-311-4101, Meeting Access Code: 132 802 1215#.

Members of the public are welcome to participate via phone or WebEx Meeting upon request. For more information on how to participate, please visit [caledon.ca/notice](https://caledon.ca/notice) or contact the Planning Department. Please note that there are deadlines by which the request to participate need to be made.

You can also ask questions or provide comments by:

- Submitting written correspondence to [agenda@caledon.ca](mailto:agenda@caledon.ca) and [planning@caledon.ca](mailto:planning@caledon.ca) for consideration during the Public Meeting. Please note that written comments will form part of the public record.
- Contacting Planning staff or the Lead Planner during office hours by phone or email.
- Booking an appointment to visit Town Hall to speak with Planning staff. Visit [caledon.ca/development](https://caledon.ca/development) for more information.

#### APPLICANT:

Evans Planning Inc. on behalf of 12599 Hwy 50 Ltd.

#### LOCATION (WARD 5):

12599, 12563 and 12585 Highway 50, and 2 Industrial Road Part of Lot 3, Concession 7 (ALB), designated as Part of Parts 2 and 4 of Plan 43R-17671, Part 2 of Plan 43R-25908 and Parts 1 & 3 of Plan 43R-14841 East Side of Highway 50 and North Side of Industrial Road

#### PROPOSED CHANGES:

The applicant has applied for an Official Plan Amendment and Zoning By-law Amendment to facilitate the development of the subject lands with a mixed use development consisting of five apartment buildings ranging in height from 18-32 storeys with associated ground floor commercial uses. The proposed Official Plan Amendment seeks to redesignate the subject lands from Bolton Highway 50 Commercial Area to Special Residential Area. The Zoning By-law Amendment seeks to rezone the subject lands from Bolton Highway Commercial (CHB), Bolton Highway Commercial Exception 389 (CHB-389) and Unserved Industrial (MU) to Multiple Residential (RM-XXX) with site specific permissions.

#### LEAD PLANNER:

Aleah Clarke, MHBC On Behalf of Development Review Services, Planning Department, Town of Caledon 905-584-2272 x.7338 [aclarke@mhbcpplan.com](mailto:aclarke@mhbcpplan.com)

#### ADDITIONAL INFORMATION:

For more information about this matter, including information about appeal rights, a copy of the proposed Official Plan Amendment and/or Zoning By-law Amendment, additional information and material, please visit [caledon.ca/notices](https://caledon.ca/notices) or contact the Lead Planner at Town Hall from Monday to Friday, 8:30 a.m. to 4:30 p.m.

"The illustration is a conceptual plan for information purposes and it is subject to change. The application is currently under review by the Town of Caledon."

#### ACCESSIBILITY:

If you require an accessibility accommodation to attend or participate in this Public Meeting, or to access any materials related to this item in an alternate format please contact Records and Information Services by phone at 905-584-2272 x.2366 or via email at [legislative.services@caledon.ca](mailto:legislative.services@caledon.ca). Requests should be submitted at least 10 days before the Public Meeting.

Multi-Tenant Landowners: Please post this notice in a visible location to all residents of the land.

633201 Hwy 10, Orangeville  
519-940-3766

When you buy from a small business you're not helping a C.E.O buy a 3rd holiday home, you are helping a little girl get dance lessons, a little boy get his team jersey, a mom or dad put food on the table, a family pay a mortgage or a student pay for college.  
Thanks for shopping local!!

# Caledon selected for Phase 2 of Natural Gas Expansion program

BY ROB PAUL

Dufferin-Caledon MPP Sylvia Jones recently announced that approximately 100 homes and businesses in Caledon, in the area of Humber Station Road, will be able to connect to natural gas for the first time thanks to the province's Natural Gas Expansion Program.

Under Phase 2 of the program, Ontario will allocate \$5,048,975 to support new connections to the natural gas distribution system and help make life more affordable in Dufferin-Caledon.

"Our government is making good on its promise to deliver affordable energy and expand natural gas pipelines to more communities," said Jones. "Access to natural gas will help more families and businesses find energy savings, while promoting economic development and job creation across Dufferin-Caledon."

In Ontario, 3.6 million homes and 160,000 businesses use natural gas, and the province is expanding its reach because it's more affordable than other sources like electricity, oil, and propane. The program encourages communities like Caledon to partner with gas distributors on expansion projects that wouldn't be built without additional financial support.

"This announcement is welcome news for residents in this part of Caledon," said Mayor

Allan Thompson. "We have long advocated for investments in rural infrastructure such as natural gas expansion and I am happy to see that once again this provincial government is listening and taking action."

The Ontario government is expanding access to natural gas across the province to help keep the cost of energy low for families, businesses and farmers. Phase 2 of the Natural Gas Expansion Program will allocate more than \$234 million to support approximately 8750 connections in 43 rural, northern and Indigenous communities.

"As part of our government's plan to make life more affordable, we prioritized broad distribution across Ontario to help as many homes and businesses keep the cost of energy low, support jobs and attract new investment," said Bill Walker, Associate Minister of Energy. "With Phase 2 of the Natural Gas Expansion program, we're putting people first and ensuring Ontario remains open for business. This will be a game-changer for these 43 communities."

The average household could save between \$250 to \$1,500 per year in energy costs by switching to natural gas from costlier fuel sources. Businesses are expected to save up to 30 per cent per year on energy costs.

"We're thrilled that through Ontario's Natural Gas Expansion Program, Enbridge Gas will

bring much needed and wanted natural gas in the most affordable way to more communities across Ontario, including this one," said Cynthia Hansen, Executive Vice President & President, Gas Distribution & Storage, Enbridge Inc. "Natural gas is the most economic way to heat buildings and water, and we are excited to work with local officials and the community to move this project forward, so residents can benefit from the cost savings, and local businesses can be more competitive."

Phase 1 of the program supported the construction of six expansion projects. These proj-

ects are forecasted to connect 9,000 customers in 16 communities over the next ten years and save customers an estimated \$250 to \$1,500 per year.

Phase 2 includes funding 28 projects and the projects that were selected were prioritized because they will connect the greatest number of customers as broadly as possible across Ontario, in the most economic and feasible way. Some of the Phase 2 projects will start as early as Summer 2021, with other start dates extending to 2025.

## To be "Stronger" sometimes you have to change

Continued from Page 12

"This is a campaign, a registration campaign. For the first time ever, we realize people won't just sign up and [we need to] sell our game a little bit."

To do so, the OMHA highlights that hockey provides more than just fun on the ice or, in this case, a mental stress-reliever. The benefits of playing the sport stem

farther out to also being involved in the community and learning life skills that will remain forever as a young child continues to grow.

Certain organizations are trying to introduce pricing packages to limit the costs incurred with registering your child to play the sport. Taylor is also trying to reach out to new Canadians to enroll their children not just for a chance to play hockey

but also for new Canadians to feel welcome in communities and make friends.

"If hockey is part of our culture, then come into our culture. That's the open-door approach that we want to have," Taylor said.

To learn more information for this upcoming winter, contact your local minor hockey association for more details.

# YOUR GUIDE TO ELECTRIC & HYBRID

## A quick look at the stats

*With the auto industry making a slow but progressive transition from internal combustion engines to electric powered vehicles, just about every automaker is offering EVs or hybrid models.*

*Here's a quick look at what major automakers are offering along with some stats that may help steer you in the right direction when looking for a model that will meet your needs and lifestyle.*

### CADILLAC

**2023 CADILLAC LYRIQ** Fully electric. Total range – approximately 480 km. Power – 340 horsepower with 324 lb.-ft. of torque. Overnight charging with DC fast charging available.

### CHRYSLER

**2021 PACIFICA HYBRID** Plug-in hybrid. Total range fully electric – 51 km. Combined driving range of up to 835 km. Fuel economy rating of 2.7 L/100 km or 105 MPG in city driving. Power: gas engine, 3.6 L, Pentastar V6, combined with 16-kWh lithium-ion battery motor. Plug-in 120 volt over night or two hours with 240 volt Level 2 charger.

### CHEVROLET

**2022 BOLT EV** Compact. Fully electric plug-in. Driving range on full charge – 417 km. DC fast charging capability is standard. Battery vehicle stats tracked in real time. One pedal driving with regenerative breaking.

### FORD

**2021 ESCAPE SE HYBRID** 2.5 L, iVCT I-4 gas engine plug-in hybrid. Electric and gas combined – 2.2 L/100 km. Gasoline only – 5.8 L / 100 km. 8-speed automatic transmission.

**2021 ESCAPE PLUG-IN HYBRID** 2.5 L, iVCT Atkinson-Cycle I-4 engine combined with electric motor with level 1 and level 2 AC charging port. Full charge in ten to 11 hours. With a 240-volt level 2 charge, time drops to approximately 3.5 hours.

**2021 FORD MUSTANG MACHE** Fully electric. Estimated range – 378 km. Speed – zero to 100 kph in 3.7 seconds. Access to FordPass Charging Network. Up to 290 horsepower. Rear wheel drive or electronic all-wheel drive. Up to 428 lb.-ft. of torque. Quick charge available.

**2022 F-150 LIGHTNING** Fully electric pickup truck. Range up to 480 km. Extended range battery comes with 80-amp Ford Charge Station Pro. Full charge over night. Can charge from 120V or 240V outlet. Two electric motors. Intelligent Backup Power system allows the vehicle to be used as a home generator.

**2021 EXPLORER HYBRID** Full-size SUV. 2.3 L EcoBoost engine with electric motor. Intelligent 4-wheel drive. 10-speed automatic transmission. Torque – 322 ft.-lb. Fuel efficiency 9.6 L /100 km combined city / highway.

### GMC

**2022 GMC HUMMER** Range Full electric pickup truck. Range – up to 600 km on a full charge. Speed – zero to 100 kph in three seconds. Horsepower – up to 1,000. Up to 11,500 lb.-ft. of torque. Fast charging available with 800V DC.

**2022 HUMMER SUV** Fully electric SUV. Range – up to 500 km on a full charge. Zero to 100 kph in 3.5 seconds. Horsepower – 830. Fast charge available with up to 300 kW. Engineered to fit 37-inch tires.

### HONDA

**2021 ACCORD HYBRID** Mid-size sedan. 2.0 L, 16 valve, DOHC 4-cylinder engine paired with two electric motors. Combined total horsepower – 212. Electric-continuously variable transmission. Fuel economy 5.5 L / 100 km city / highway combined.

**2021 INSIGHT HYBRID** Mid-size sedan. 1.5 L, 16 valve Atkinson cycle DOHC i-VTEC 4-cylinder engine combined with two electric motor. 197 lb.-ft. of torque. Electric continuously variable transmission. Three driving modes – sport, econ, EV. Can switch to fully electric drive of short distances.

**2021 CLARITY PLUG-IN** Mid-size sedan. Full driving range – 547 km. 1.5 L, 16 valve Atkinson cycle DOHC, 4-cylinder gas engine combined with electric motor. Combined horsepower – 212. Torque – 232 lb.-ft. Three drive modes. 2.5 hour charge time. Can run on full electric power for up to 76 km.

**2021 CR-V HYBRID** Mid-size SUV. Full range – 600 km. Speed – zero to 100 kph in 7.5 seconds. Power – DOHC 16-valve Atkinson-cycle 2.0 L, 4-cylinder engine and permanent-magnet synchronous AC motor producing 212 combined horsepower.

### HYUNDAI

**2021 KONA** Fully electric. Sub compact. Range on full charge – 415 km. Fast charging capability – up to 80 % in one hour with Level 3, 100 kw fast charging station. Variable torque with Drive Mode Select feature. Accelerates from zero to 100 km/h in 7.6 seconds.

**2021 IONIQ 5** Fully electric compact SUV. Available in all-wheel drive. Range on full charge – 480 km. Overnight charging. Up to 80 % in 18 minutes with an 800 Ultra-rapid charger. Can pride up to 100 km range with a five minute charge.

**2021 IONIQ HYBRID** Full range – 1,125 km on a full tank of gas. Combined fuel economy 4.0 L/100 km. Regenerative braking. 1.6 L, GDI engine with 139 horsepower, 195 ft.-lb. of torque. Dual clutch 6-speed transmission.

**2021 IONIQ HYBRID PLUG-IN** Can travel up to 47 km on full battery power. Full range – 1,001 km on a single tank of gas. Level 2 charger provides full charge in three hours. 1.6 L, GDI gas engine with Dual clutch and 6-speed transmission.

**2021 ELANTRA HYBRID** 4-door sedan. Up to 955 km on a single tank of gas. Fuel economy rating of 4.4 L / 100 km. Smartstream 1.6 L, gasoline direct injection engine paired with a 32 kw electric motor. Combined 139 horsepower and 195 lb.-ft. of torque.

**2021 SONATA HYBRID** Mid-size sedan. Equipped with solar panel roof. 2.0 L, Smartstream engine that provides 5.0 L per 100 km, city / highway combined. 6-speed automatic transmission with Active Shift Control technology.

**2022 TUSCON HYBRID** Mid size SUV. 1.6 L, turbocharged 4-cylinder engine with 6-speed transmission. 44 kw electric motor. Combined power – 227 horsepower and 258 lb.-ft. of torque. Total range – around 800 km. Combined fuel rating of 6.4 L / 100 km.

### JEEP

**2021 WRANGLER PLUG-IN** Full range – up to 595 km. All electric range up to 34 km. 2.0 L, gas motor is paired with a plug-in hybrid electric motor with a 17 kWh lithium-ion battery pack. 8-speed automatic transmission.

**2021 GRAND CHEROKEE 4XE** Full-size SUV. Jeep has announced plans for a plug-in hybrid version of the Cherokee. Details are expected to be released soon.

**GRAND CHEROKEE L 4XE** Full-size SUV. Jeep has announced plans for a plug-in hybrid version. Details are expected to be released soon.

### KIA

**2021 NIRO EV** Fully electric SUV. Range – 385 km. 64 kWh lithium-ion polymer battery. Fast charging port allows 80 % charge in 54 minutes with level 3 DC 100 Kw fast charger. Regenerative braking system.

**2020 NIRO HYBRID** 1.6 L, gasoline engine paired with electric motor. Gas engine – 1.6 L, GDI 4-cylinder. Efficiency – 4.7 L / 100 km combined city / highway. Combined horsepower – 139. Comes with UVO Intelligence system that can be controlled with a smartphone. Front wheel drive.

**2020 NIRO PLUG-IN** Can operated on full electric mode at low speeds. Efficiency – 2.2 L / 100 km, city / highway combined. Combined horsepower – 139. 6-speed transmission. Comes with UVE Intelligence system that can be used with a smartphone.

**2021 SOUL EV** Fully electric SUV. Lithium-ion polymer battery. Full range – 282 km at full charge. Extended range – 383 km. 201 horsepower with 291 lb.-ft. of torque. Front wheel drive. Full charge on level 1 charger – 36 hours. Level 2 charger – 6 hours.

**2022 EV6** Fully electric sedan. Range – 500 km. 800V DC fast charging provides range of up to 350 km in 18 minutes. Two different battery selections available. Top end can accelerate from zero to 60 in 3.5 seconds.

### LINCOLN

**2021 AVIATOR BLACK LABEL GRAND TOURING PLUG-IN HYBRID** full-size luxury SUV. Twin-turbocharged 3.0 L, V6 engine paired with a Grand Touring powertrain and battery-powered Nano electric motor. 10-speed automatic transmission. All electric range – 35 km. Full charge in four hours.

**2021 AVIATOR GRAND TOURING PLUG-IN HYBRID** full-size luxury SUV. All electric range – 35 km. Combined horsepower – 494 with 630 lb.-ft. of torque. 3.0 L, V6 twin turbo-charged gasoline engine. Additional drive-modes including Preserve EV and Pure EV.

**2021 CORSAIR GRAND TOURING** Plug-hybrid full-size SUV. Gasoline engine paired with electric motor. Full electric range – 47 km. All-wheel electric drive. Charging time – four hours.

### MAZDA

**2022 MX-30** Fully electric compact crossover. Single electric motor with 107 kW producing 144 horsepower and 200 ft.-lb. of torque. Front wheel drive. Designed for short distance city driving. Range – 200 km. Fast charge capability providing a charge of 20 to 80 per cent with 36 minutes charge time.

### MITSUBISHI

**2021 OUTLANDER PHEV** Plug-in. Mid-size SUV. 13.8 kWh lithium-ion battery. 2.4 L, MIVEC gasoline engine. Three drive modes. 4-wheel drive capability. Full charge level 1 household current – 9 hours. Level 2 charger 4 hours.

### NISSAN

**2021 LEAF** Fully electric compact crossover. Range on full charge – 363 km with 62 kWh battery. 240 kms with 40 kWh batteries. 214 horsepower. Three levels of charging from standard to fast. Smart phone compatible vehicle and battery information.

**2022 ARYA** Plug-in crossover. Fully electric. Range on a full charge – up to 482 km. Choice of two batteries and two available drivetrains. Fast charging provides up to 375 km, after 30 minute charge. E-force all-wheel drive.

### TOYOTA

**2021 SIENNA HYBRID** Mini-van. 2.5 L, 4-cylinder DOHC 16 valve, Hybrid Synergy Drive. Two high-output electric motors. EV mode allows for fully electric driving at low speeds and short distances. Fuel efficiency – 6.5 L / 100 km combined rating.

**2021 PRIUS PRIME** Plug in Hybrid sedan. Total combined range – 1,035 km. Charging time – 5 hours 30 minutes. Combined highway / city fuel efficiency – 1.8 L/100 km. 1.8 L, 4-cylinder DOHC 16-valve engine with variable timing.

**2021 RAV4 PRIME** Plug-in Hybrid mid-size SUV. Electric only range – 68 km. Total combined range of 979 km. 6.6 kW AC charger. 302 combined horsepower with 165 lb.-ft. of torque. 2.5 L, gasoline engine. Electronic all-wheel drive.

**2021 VENZA HYBRID** Mid-size crossover. 2.5 L, DOHC 4-cylinder engine combined with three electric motors. Combined 219 horsepower with manufacturer estimated 6.1 L/100 km combined fuel efficiency. On demand AWD system that can distribute 80 per cent of driving force to rear wheels using dedicated electric motor.

**2021 COROLLA HYBRID** Compact sedan. 1.8 L, 4-cylinder gas engine - Hybrid Synergy Drive. 121 horsepower. Fuel efficiency 4.5 L /100 km, combined. Regenerative braking automatically transforms energy into electricity and stores it in the batter.

**2022 RAV4 HYBRID** Mid-size SUV. 2.5 L, DOHC engine with variable valve timing. Hybrid Synergy Drive paired with electric motor. Horsepower – 219. Fuel efficiency 5.8 city, 6.3 highway / 100 km. Electronic on-demand all-wheel drive.

**2021 CAMRY HYBRID** mid-size sedan.2.5 L, 4-cylinder DOHC 16-valve engine, Hybrid Synergy Drive. Drive modes – Sport, Economy, Normal. Horsepower – 208 Net HP. Fuel efficiency – 4.0 city, 4-8 highway / 100 km.

**2021 HIGHLANDER HYBRID** Full-size SUV. Rear-mounted electric motor powers the rear wheels. 2.5 L, 4-cylinder gas engine. Hybrid Synergy Drive. Horsepower – 243 Net. Fuel efficiency – 6.7 L / 100 km combined city / highway.

### VOLVO

**2022 XC40 RECHARGE** Fully electric compact SUV. Full range – up to 335 km. Electric motor produces 402 horsepower. Speed – zero 100 kph in 4.9 seconds. Fast charge – 80 per cent charge in 40 minutes.

**2022 XC40 RECHARGE CROSSOVER** Full range – up to 320 km. Speed – zero to 100 kph in 4.7 seconds.

**2021 XC60 RECHARGE** Plug-in hybrid mid-size SUV. Seats five passengers Full electric range – up to 31 km. Efficiency – combined 8.7 L / 100 km.

**2021 XC90 RECHARGE** Mid-size SUV. Plug-in hybrid. Full electric range – up to 29 km. Combined fuel efficiency – 8.4 L / 100 km. Electronic all-wheel drive. Gasoline engine paired with electric motor.

**2021 V60 RECHARGE** Wagon plug-in hybrid. Full electric range – up to 35 km. Electronic all-wheel drive. Efficiency – 7.0 L / 100 km. Speed – zero to 100 km in 4.5 seconds.

2022 Lincoln Aviator Grand Touring Plug-in Hybrid

*As the automotive world begins to shift focus and move toward electric power, Lincoln is keeping pace by introducing vehicles into its line-up that take advantage of new technology and provide a more efficient way of travelling.*

Lincoln's vehicles combine the efficiency of electric power with the reliability and full range, and confidence of a gasoline engine.

By combining the two power sources, drivers can enjoy the cost savings of full-electric power for short trips and not have to worry about the range anxiety associated with fully electric vehicles.

The new hybrid line-up maintains all the luxury standards and features that the Lincoln brand is known for, and drivers have come to appreciate and rely on.

**2021 AVIATOR GRAND TOURING PLUG-IN HYBRID**

The 2021 Aviator Grand Touring plug-in hybrid is a full-size SUV that combines a luxury ride with a lot of power on the road.

With a 3.0 L, V6 Twin Turbo-charge gas engine under the hood paired with a 13.6 kWh battery pack and 75-kW electric motor, this vehicle produces a combined 494 horsepower with a massive 630 lb.-ft. of torque.

For short trips, you can go 35 km on full-electric power and not use any gas at all.

There are five drive modes to choose from depending on road conditions and your driving style.

The Aviator Grand Touring plug-in has two additional drive modes you can select that modify the electric motor's performance.

You can choose Pure EV for full-electric power when you are just running about town or select Preserve EV when you are on longer trips and want to save stored energy for use at a later time.

On the outside, the Aviator Grand Touring is designed with a sleek air of sophistication and refinement.

From the distinguished mesh front grille and wrap-around headlights to its intentional horizontal lines and sloping roof, the Aviator has a streamlined feel creating a sense of power and motion.

The interior is crafted for driver and passenger comfort with meticulous attention given to detail, surrounded by wood grain and chrome accents that provide a sense of style – that is unmatched.

You are surrounded by technology when you take your place behind the wheel.

2022 Lincoln Aviator Grand Touring Plug-in Hybrid Interior

With Lincoln Co-Pilot 360 Plus, driver-assist features include Evasive Steering Assist, Reverse Brake Assist, Active Park Assist Plus and Traffic Jam Assist. Traffic Jam Assist combines Adaptive Cruise Control, Stop and Go, Lane Centering, and newly developed Traffic Sign Recognition.

The 2021 Lincoln Aviator Grand Touring plug-in hybrid is a full-size SUV that offers a luxury ride and superior handling with the convenience and fuel efficiency of added electric power.

The charging time for the electric motor is four hours.

With the electric all-wheel drive, you will feel the instant gratification of effortless acceleration and greater performance.

The Corsair is available in ten exciting colours that were selected to best highlight the vehicle's curves and design. There are five colours to choose from for the interior design.

Inside, the Corsair is crafted with attention to even the smallest details with unique design cues that add to the luxury feel. Driver and passenger comfort is at the top of the list with unique and comfortable seats and plenty of room.

**2021 LINCOLN CORSAIR GRAND TOURING PLUG-IN HYBRID**

The 2021 Lincoln Corsair Grand Touring plug-in hybrid luxury crossover is designed to be quick and agile with easy handling while maintaining the luxury features of the Lincoln brand.

This plug-in hybrid pairs a gasoline engine with an electric motor for a whisper-quiet ride.

You can travel up to 47 km on full-electric power when you are doing short trips.

When you're on the road you will have no problem staying connected to the world.

There's a sleek user-friendly interface to help you connect to your smartphone through Apple CarPlay and Android Auto.

With the available Lincoln Co-Pilot 360 Plus, it's like having another driver on board.

The driver-assist functions include a 360-degree camera, Active Park Assist Plus, Evasive Steering Assist, Reverse Brake Assist and Adaptive Cruise Control with Traffic Jam Assist which includes Stop-and-Go and Lane Centering.

The exterior design of the Corsair Grand Touring is enhanced with S-curves implemented into the body contour to produce a confident yet elegant appeal.

The 2021 Lincoln Corsair Grand Touring plug-in hybrid provides refinement, luxury, and the added feature of electric hybrid technology in a beautifully designed crossover.

The 2021 Lincoln line-up of plug-in hybrid vehicles offer the luxury and style of the Lincoln brand with the efficiency and added convenience of electric power.

Visit your local Lincoln dealer to see the full line-up of plug-in vehicles and the entire line-up of Lincoln products.

KIA Niro Shown

# KIA Looking to the future with hybrid, PHEV, and fully electric vehicles

*The future is already here with Kia's line-up of fully electric, PHEV, and hybrid vehicles. Beautifully engineered and designed, electric power provides efficiency, operating savings, and instant torque when you hit the gas.*

## KIA NIRO

The Kia Niro comes in three electric models, each with its own unique abilities.

A crossover built for city driving convenience or highway excursions, the Niro handles both equally well. The Niro EV is a fully electric-powered vehicle that provides zero emissions, powerful torque, and the quietest ride possible.

The 64 kWh lithium-ion battery and electric motor produce 201 horsepower and 291 ft.-lb. of torque.

With a range of up to 385 km, the Niro EV is an outstanding vehicle for drivers who have a dedicated route – such as commuters who know how far they will drive every day.

Depending on your driving, you may need to charge your vehicle only once each week.

A fast-charging port allows for an 80 percent charge in only 54 minutes with a level 3 DC 100 kW charger.

The regenerative braking system collects energy every time you brake and puts it back into the battery.

You can stay on top of your vehicle's performance with the advanced UVO Intelligence system that comes standard on every Niro EV. Essential features like the vehicle's battery charge status, charge level, and driving range make your journey a confident experience.

With the hybrid system, you don't have to worry about charging the battery – the vehicle does it for you automatically.

You can monitor your vehicle's performance on the main console screen that provides information about your vehicle and which motors are being used.

The Niro has the ability to determine the best use of either gas or electric power based on your driving conditions.

The Niro PHEV model provides the convenience of gas and electric power with the ability to run on electricity alone if you want.

With the combined 1.6 L, GDI 4-cylinder gas engine and electric motor, the Niro PHEV provides 139 horsepower, mated to a 6-speed Sportmatic automatic transmission.

This provides 195 lb.-ft. of torque for instant acceleration.

When it comes to fuel efficiency, you can achieve 2.2 km / 100 km combined city and highway driving.

You can switch to fully electric power at low speeds and save gas.

Both stylish and convenient with plenty of interior room and safety technology, the Niro series of electric vehicles provides confidence and efficiency.

## KIA SOUL EV

The Kia Soul EV is a fully electric vehicle with a bold design, a comfortable and roomy interior, and all the advantages that come with passing a gas station and never having to stop.

With a range of up to 383 km at full charge, the Soul EV gives you confidence on the road whether you are running about town or planning a longer trip.

The UVO Intelligence System provides you with a world of support services from vehicle diagnostics to other remote services.

Driving an electric vehicle provides a near maintenance-free driving experience.

With an electric motor, you no longer have to worry about oil changes, engine parts, or exhaust system replacement.

The 327 V electric motor works with front-wheel drive and produces 134 horsepower and up to 201 horsepower on the EV Limited edition.

With 291 lb.-ft. of torque, you will have instant gratification when you hit the gas.

The Limited Edition provides a range of up to 383 km on a full charge.

You can charge the battery right at home and upgrade to faster-charging systems.

The Kia Soul EV is a fully electric vehicle designed to be fun to drive, nice to look at, and delivers all the practicality and convenience of electric power.

2021 Jeep Wrangler 4XE Plug-In Hybrid

# JEEP

provides exciting options with new hybrid vehicle

*As the automotive world continues to evolve, automakers are adapting to new ways of designing and engineering cars, crossovers, SUVs, and trucks.*

There is a trend towards producing more electric, hybrid, and plug-in hybrid vehicles to replace internal combustion engines and eventually eliminate the need for fossil fuels for personal travel.

The goal of automakers is to extend the range of electric-powered vehicles; while at the same time, develop a new network of charging stations that will allow drivers with electric power to travel without fear of being stranded with a dead battery.

The solution to avoiding range anxiety in electric vehicles is to produce vehicles that use a combination of electric and gasoline power.

Hybrid vehicles use a gas motor and one or more electric motors to power the vehicle. A hybrid does not require the driver to charge the battery - this is done automatically by the vehicle

through regenerative braking that uses the stopping system to generate power back into the battery.

A hybrid vehicle uses smart technology to determine the best combination of electric and gas power for the most efficiency when on the road.

A plug-in electric vehicle requires the user to plug in the vehicle to recharge the battery. There are several levels of charging from standard to quick charges.

Both types of vehicles can run on fully electric power for short distances.

The advantage of hybrid and plug-in vehicles over fully electric is your vehicle will still run with the gasoline engine even if the battery is drained.

## 2021 JEEP WRANGLER 4XE PLUG-IN HYBRID

The 2021 Jeep Wrangler 4XE Plug-in hybrid brings electric power to the already rough and rugged off-road vehicle.

Built to take on any challenge, the legendary Wrangler 4XE now comes with the added torque that electric power can provide.

The Wrangler 4XE plug-in hybrid boasts a full range of up to 595 km on a full tank of gas.

The 2.0 L, Turbo engine is paired with an electric motor with a 17 kWh lithium-ion battery pack and an 8-speed automatic transmission.

You can drive up to 34 km on electric power alone, meaning during short trips around town, you won't use any gas at all.

With this hybrid Wrangler, you'll never experience any kind of electric range anxiety. If you run out of

battery power the vehicle simply adjusts by using the gas engine to keep you going on your way.

The 2021 Jeep 4XE Wrangler gives you the fabled Jeep look, feel, and rugged capability with enough interior comfort and convenience features to make even the longest road trips a pleasure.

There is a wide range of available interior colours, styles, textures, and materials to choose from- you can customize to suit your personal taste.

While the Wrangler 4XE has an 80-year, 4x4 heritage, it's also packed with the latest technology. You'll stay connected when you are on the road with the available Uconnect system with a full-colour touchscreen.

On the outside, the Wrangler 4XE looks impressive, because it is. With its high ground

clearance, its big tire stance, and body options, there is no mistaking the Wrangler's capability.

The new Wrangler 4XE has a full range of options for new wheels this year, so you can choose a style you like to really make your Jeep your own.

The 2021 Jeep Wrangler 4XE plug-in hybrid brings electric power and fuel efficiency to this already rugged and capable vehicle that is designed to take on any challenge.

Jeep has already announced plans to electrify its Grand Cherokee model as well. For now, they are keeping this new version under wraps with plans to announce all the exciting details of the Grand Cherokee hybrid at a future date.

2021 Jeep Wrangler 4XE Plug-In Hybrid Interior

## Manufacturers drive forward to electric vehicles

*As the automotive world makes a slow transition to building electric powered vehicles, manufacturers are adapting to new ways of production as well as making new investment in their future designs.*

While the move to eliminate internal combustion engines and the reliance on fossil fuels has been ongoing for several years, it is a slow process.

The automotive industry is huge worldwide. As the old saying goes: "the larger the ship, the longer it needs to turn."

To date, there are three types of electric vehicles being produced. Hybrids - which have a gas motor and self-recharging electric motor. Plug-ins - a gas motor and electric motor which require the owner to plug-in to recharge the battery. And fully electric which typically have two or more electric motors that must be charged to run the vehicle.

There are also hydrogen fuel cell vehicles which convert the gas to electricity, however they can only be used in very few places and are unlikely to become popular any time soon.

Most automakers have at least a couple of hybrids or plug-ins in their line-up of vehicles, but no manufacture except Tesla has decided to go fully electric.

Most of the auto manufactures have announced plans or the direction they plan to take over the next decade when it comes to producing electric vehicles.

Toyota, whose vehicles currently account for more than 80 per cent of the global hybrid market, announced plans to generate half of its sales from electrified vehicles by 2025. That's five years earlier than it previously estimated.

Toyota already has its own battery making operations and will expand that by partnering with Chinese battery manufacturers.

Volkswagen has already said it plans to spend around \$86 billion over five years to develop EVs.

The auto maker said it is planning to make up to 40 per cent of its global fleet electric by 2030. It is also moving ahead with plans to reach a target of 1 million electric cars produced by the end of 2023.

General Motors announced that their Cadillac division will be its lead brand when it comes to electric vehicles, saying the majority of Cadillac

models would be electric by 2030, and also left open the possibility that the entire line-up may be electric by that time.

GM was the second company to sell 200,000 electric cars in the U.S.

GM is planning to release a full-size luxury SUV in a fully electric model.

The big news from Ford was the release of the Mustang Mach-E, all electric sports coupe.

Ford previously announced that they are increasing plans for electric production in 2022 with a line-up that would include 40 electrified vehicles.

Ford has also released the all-new F-150 Lightning - an all-electric version of its wildly popular pickup truck.

Honda has moved ahead with plans to electrify their vehicles and actually started earlier than predicted to start production.

They moved up their program to 2022 - three years earlier than planned - to start selling all models that are at least partially electrified.

At Nissan, engineers have been working on new vehicles and increasing the range of those vehicle on a single charge.

Nissan claims the new version of its Ariya EV, crossover will be able to travel 300 miles on a single charge and go from zero to 60 mph in less than five seconds.

Nissan manufactures the popular Leaf compact fully electric crossover.

Jeep has started producing its iconic off-road vehicles with electric versions.

There are now hybrid versions of the Jeep Compass, Renegade, and Wrangler.

Reaction from Jeep enthusiasts has been favourable noting the vehicle's ability to produce extra torque which comes in handy when you leave the pavement.

Hyundai has started offering hybrids, plug-ins, and fully electric versions of its new models.

The fully electric versions of Hyundai vehicles have turned out to be more popular than the automaker anticipated. Unfortunately, a shortage of batteries has held them back from full production.

Hyundai along with KIA of whom they own a big share, announced in 2017 that plan to bring 38 'green car' models to the market within eight years.

Kia announced that they will invest \$25 billion by the end of 2024, with a plan to sell 500,000 electric vehicles annually by 2025.

In 2018, Chrysler announced it would be putting \$9 billion into 'building cars that have electric motors.'

The automaker makes the Pacifica minivan in a hybrid model.

Mitsubishi is boosting its plans to create hybrid vehicles and plans to add five or more to its line-up.

The company shifted focus a couple of years ago with a push to start producing four-wheel drive, fully electric and plug-in vehicles.

The Mitsubishi Outlander PHEV had turned out to be a big seller with good reviews.

Mazda is now planning on making more electric vehicles including the fully electric MX-30, with more hybrid models planned. Mazda prefers using its 'lean burn' gas engines for larger vehicles, indicating they believe the most efficient powertrain for full-size vehicles is a 'Diesel engine coupled with an electric motor.'

While the automotive world is moving toward electrifying their vehicles and abandoning hydrocarbon fuels, consumers are still a little leery of full electric power.

The most common fear is still range anxiety. While many people can accommodate an

electric daily driver others may find it difficult in having the confidence of making it to a long range destination.

Drivers who have a fixed commute every day can easily plan ahead just by knowing their driving distance and vehicle range.

On a long road trip, that could be a guessing game depending on where you are travelling to and availability of charging stations.

Worries about finding a charging station still makes some motorists hesitant in putting down their hard earned cash on a fully electric ride.

Hybrids and plug-ins provide the added protection of a gasoline engine, which appeals to many drivers who feel safer knowing they are far more likely to find a gas station than they are an electric charging station.

As engineers re-design and improve battery technology and increase range, and charging station routes are established, more drivers will be switching to electric power.

# HYUNDAI

offers electric and hybrid models that provide long-range and fuel efficiency

*As the automotive world makes a transition from gas-powered internal combustion engines to zero-emissions electric power, Hyundai is leading the way in producing the technology and vehicles that are emerging as the new way to travel.*

With an exciting line-up of fully electric and hybrid vehicles, Hyundai offers drivers a range of vehicles that will accommodate both commuters who need a reliable ride to work and can rely on electric power, as well as those who spend a lot of time on the road and appreciate the convenience and efficiency of a hybrid.

### 2021 HYUNDAI KONA EV

The 2021 Hyundai Kona EV is a sub-compact SUV that combines versatility with a fun driving experience.

The fully electric Kona combines the instant torque of an electric motor with the confidence of having a range of up to 415 kilometres on a single charge.

If you're a driver who uses a vehicle for commuting purposes, you may only have to charge your vehicle once a week, depending on the distance you drive and your lifestyle.

The Kona allows the convenience of charging at home, at work, or at a public charging station.

For real convenience, you can order a Level 2 charger which is five times faster than a conventional charger and allows a full charge in 9 hours 35 minutes.

The Kona is stylish on the outside, and surprisingly roomy on the inside with a battery design that allows for a spacious interior.

With Drive Mode Select, you can adjust the feel and powertrain response to match your driving style.

The 2021 Hyundai Kona EV is a convenient, peppy, and stylish sub-compact designed for people who enjoy the experience of passing a gas station and never having to stop.

### 2022 HYUNDAI IONIQ 5

The 2022 Hyundai IONIQ 5, is the brand-new all-electric compact SUV that thrills people who are environmentally aware.

With eco-friendly recycled materials and zero emissions, the IONIQ 5 changes the standard when it comes to electric vehicles.

With a range of 470 to 480 kilometres on a full charge, the IONIQ 5 eliminates range anxiety and gives you the confidence to travel without worrying about running out of power.

When charging with an 800V ultra-rapid charger, the vehicle can be charged to 80 percent in just 18 minutes. If you're in a hurry, the five-minute charge will give you a range of up to 100 kilometres.

The IONIQ 5 is the first Hyundai electric vehicle available with all-wheel drive providing confidence in all driving conditions.

With interior features like a 12-inch infotainment screen and a customizable 12-inch digital cluster, the IONIQ 5 fully electric vehicle is as convenient as it is fun to drive.

### 2022 HYUNDAI TUCSON HYBRID

The 2022 Hyundai Tucson Hybrid is a mid-size SUV that provides the style and convenience of a sport vehicle with the efficiency and cost savings of a hybrid vehicle.

With the available 1.6 L, Turbocharged Hybrid engine and a 44.2 kW electric motor power by a 1.59 kWh lithium-ion battery, the Tucson Hybrid has a combined 227 horsepower and 259 lb.-ft. of torque.

The Tucson has an all-new design for this year. It boasts a modern style with angular body panels,

cutting-edge illumination and bold, chiselled surfaces.

A new LED headlight design and snazzy front grille provide an outstanding head-on appearance.

Inside, the cabin is roomy and spacious. There is a standard 8-inch touch-screen with an available 10.25-inch touch-screen integrated into the waterfall-inspired centre console.

Standard Android Auto and Apple CarPlay with available wireless connectivity let you access your favourite mobile apps, music, maps, and messages.

The 2022 Hyundai Tucson Hybrid is a mid-size SUV with style convenience and the added bonus of hybrid efficiency.

### 2021 HYUNDAI SANTA FE HYBRID

The 2021 Hyundai Santa Fe Hybrid has been redesigned inside and out and is equipped with an extensive suite of available Hyundai SmartSense safety features.

The hybrid version of this popular SUV gives you the best of both worlds when it comes to power and efficiency.

The Hybrid Santa Fe is equipped with a 1.6 L,

Smartstream Turbo gasoline engine and a 44.2 kW electric motor powered by a 1.49 kWh lithium-ion battery.

Combined they produce 226 horsepower and 258 lb.-ft. of torque.

The Intelligent Drive Mode system allows you to customize the traction distribution for confidence in any type of terrain. You can choose between sand, smart, mud, sport, snow, and comfort modes.

The Santa Fe comes with an abundance of standard and available intuitive technology features that will make your drive both easier and more enjoyable.

The 2021 Hyundai Santa Fe Hybrid offers the capability of an SUV while providing the fuel efficiency and long-range of a hybrid vehicle.

The new line-up of Hyundai fully electric and hybrid vehicles provides an exciting future for motorists who appreciate the eco-friendly design and efficiency of new technology.

The new line-up of Hyundai fully electric and hybrid vehicles provides an exciting future for motorists who appreciate the eco-friendly design and efficiency of new technology.

Driving range of 1,125 kilometres based on a 45-litre tank and 4.0 L/100 km combined fuel economy for the 2021 IONIQ Hybrid Essential model. Fuel economy figures are based on manufacturer's testing and are used for comparison purposes only. Actual fuel efficiency may vary based on driving conditions and the addition of certain vehicle accessories.

# TOYOTA leading the way in hybrid technology

*As the automotive world continues the transformation from internal combustion engines to electric power, Toyota is at the leading edge of new technology with the largest line-up of hybrid and plug-in electric vehicles of any manufacturer.*

*Since the introduction of the Toyota Prius hybrid in 2001 – the first mass-produced hybrid to hit the North American market – Toyota engineers have worked to improve everything about their electric vehicles from battery design to fuel efficiency.*

*The result is a full line-up of hybrid and plug-in vehicles that range from sedans and crossovers to full-size SUVs that combine the power of a gas engine with the fuel efficiency of an electric motor.*

## 2021 TOYOTA RAV4 PRIME

The 2021 RAV4 Prime Plug-in hybrid is a mid-size SUV that can travel up to 68 kilometres when on full electric power. On a full tank of gas, the total combined range of the RAV4 Prime is 979 km.

Powered by a 2.5 L gasoline engine and electric motor, the combined horsepower achieved is 302, with 165 lb.-ft. of torque.

With standard electronic all-wheel drive, you will have the confidence to take on the open road or turn off the highway and explore less tamed roadways.

The RAV4 Prime has been designed to be sporty, athletic and intelligently engineered.

The available bird's-eye view monitor, head-up display, kick sensor power back door, intelligent clearance sonar, heated and ventilated driver and front passenger seats add to the experience of driving this vehicle.

## 2021 TOYOTA RAV4 HYBRID

In the hybrid version, the 2022 Toyota RAV4, features a 2.4 L, DOHC engine with variable valve timing that is paired with an electric motor for a combined 210 horsepower.

You don't have to worry about charging the battery – the vehicle does it for you through regenerative braking. Toyota's Hybrid Synergy Drive automatically chooses the optimal source and blend of power for maximum fuel efficiency.

Electronic on-demand all-wheel drive provides confident driving in all weather conditions.

The RAV4 hybrid is available in several models including the Limited, Trail, and Off-road versions.

Sporty, rugged, yet beautifully styled, the RAV4 provides capability and convenience with increased fuel efficiency.

## 2021 TOYOTA PRIUS PRIME

The 2021 Toyota Prius Prime plug-in hybrid is a mid-size sedan that boasts an impressive total combined range of 1,035 kilometres.

The 1.8 L, 4-cylinder DOHC 16-valve engine works with an electric motor for maximum fuel efficiency. The battery can come to full charge in only 5 hours 30 minutes.

The Prius Prime is beautifully designed with outstanding body contours and plenty of room on the inside, with space for five passengers comfortably.

Loaded with technology, the available 11.6-inch display screen with embedded navigation is built with smartphone logic.

Equipped with three different drive modes, you can maximize power and fuel efficiency depending on your mood and driving conditions.

## 2021 TOYOTA SIENNA HYBRID

The 2021 Toyota Sienna hybrid is a mini-van that utilizes two high-output electric motors that are paired with a 2.5 L, 4-cylinder DOHC 16 valve engine with Hybrid Synergy Drive.

With the Sienna, you can switch to fully electric power at low speeds and short distances, meaning you can plan a run to the grocery store and not burn any gas at all.

The Sienna's electronic on-demand all-wheel-drive system gives you complete confidence in any road conditions. The torque distribution is indicated on the multi-information display.

With room for up to eight passengers depending on configuration, you are surrounded by intelligent and intuitive technology that helps keep you safe, informed, and simplify everyday life.

## 2021 TOYOTA HIGHLANDER HYBRID

If a full-size SUV is what you need, the 2021 Toyota Highlander Hybrid is a vehicle that has flexible seating for up to seven or eight passengers or the room to store a lot of gear for a weekend adventure.

As a hybrid vehicle, the Highlander has a rear-mounted electric motor dedicated to powering the rear wheels.

With a 2.5 L, 4-cylinder gasoline engine and Hybrid Synergy Drive, the Highlander Hybrid uses both gas and electric power and determines which combination provides the best fuel efficiency.

Designed to be rugged yet sophisticated, the Highlander achieves rugged capability while maintaining superb passenger comfort.

Toyota is leading the way in hybrid and plug-in technology.

### 2021 VENZA HYBRID

The 2021 Venza Hybrid is a mid-size crossover that blends a smart and stylish design with a refined interior.

A 2.5 L, DOHC 4-cylinder engine is combined with three electric motors that produce a total of 219 horsepower with a manufacturer estimated 6.1 L/100 km combined fuel efficiency.

The on-demand AWD system can distribute 80 percent of the driving force to rear wheels using a dedicated electric motor.

With standard electronic on-demand all-wheel drive and advanced safety features including Toyota Safety Sense 2.0, the Venza gives you full confidence on the road whether you are on the open highway or just cruising around town.

### 2021 COROLLA HYBRID

The 2021 Corolla Hybrid is a compact sedan that is a popular vehicle for a reason. It is stylish, well-contoured, and has a feel of sophistication.

The Corolla hybrid is powered by a 1.8 L, 4-cylinder gas engine and an electric motor that is monitored by Hybrid Synergy Drive for maximum capability and efficiency.

With 121 horsepower, this vehicle is equally at home during highway or urban driving.

The regenerative braking system automatically transforms energy into electricity and stores it in the battery.

The Corolla is available in 13 colours, including two-tone versions that give this ehicle some extra pizzazz.

### 2021 TOYOTA CAMRY HYBRID

The 2021 Toyota Camry Hybrid is an athletically styled mid-size sedan that is as good to look at as it is convenient and capable.

With this hybrid system, you can select from three drive modes depending on road conditions and how you feel at the moment.

Sport mode gives the vehicle an added boost of power, while economy mode provides fuel-efficient driving. Normal mode allows the vehicle to determine the best use of gas and electricity to power the vehicle.

Powered by a 2.5 L, 4-cylinder DOHC 16-valve engine and electric motor, Hybrid Synergy Drive determines the best use of power to move the vehicle.

There is a wide range of colours available – each chosen specifically to enhance the body contours and design.
