

Additional parking spots open at King City GO Station

Ontario is making it easier for commuters in the area to take public transit by adding more parking spaces at the King City GO Station.

As of Oct. 13, 72 new parking spaces are open at the existing lot at the King City GO Station, bringing the total number to 502.

Later this fall, construction will begin on more than 60 additional new spots, which will be available in the spring of 2016.

This project is part of the largest infrastructure investment in Ontario's history - more than \$130 billion over 10 years, which will support more than 110,000 jobs per year on average, with projects such as roads, bridges, transit systems, schools and hospitals.

Improving daily commutes is part of the government's plan to build Ontario up. The four-part plan includes investing in people's talents and skills, making the largest investment in public infrastructure in Ontario's history, creating a dynamic, innovative environment where business thrives, and building a secure retirement savings plan.

Since 2003, the Ontario government has extended GO's rail network by nearly 90 kilometres, opened 14 new stations, rebuilt four existing stations, and added more than 31,000 new parking spots across the system.
