Dufferin-Caledon residents will soon have access to an MRI machine right at home.

On January 14, the Headwaters Health Care Foundation announced the completion of its largest-ever matching gift campaign.

Thanks to the generosity of local residents, and the Morningview Foundation, \$3 million was raised for Smart Headwaters, the foundation's campaign to bring an MRI machine and more to the Headwaters Health Care Centre.

The MRI machine will help to improve diagnosis and treatment outcomes for patients with a variety of conditions, and importantly, will reduce the need for patients to leave the region to access critical care.

Headwaters Health Care Foundation CEO K.C. Carruthers said the response from the community for the campaign has been nothing short of incredible.

"We are deeply grateful for the support of every individual, business, and organization who contributed to this challenge," said Carruthers. "Together, we have made a transformative impact on our healthcare system, ensuring that our loved ones will have access to the highest quality care right here at home."

The completion of the \$3-million matching gift campaign brings the Headwaters Health Care Foundation significantly closer to its \$18-million Smart Headwaters fundraising goal.

In a statement, the Morningview Foundation said it was thrilled to partner with the Headwaters Health Care Foundation.

"The success of this matching gift challenge highlights the strength and generosity of the community, and we are proud to be part of such a meaningful project that will benefit so many," they said.
